The image on the front cover was chosen to highlight Clarke's Weaver, *Ploceus golandi*, adopting the English name, Kilifi Weaver, in this Checklist in order to support this endemic bird's conservation. Its scientific taxonomy does not change. Photo by Colin Jackson.

Nature Kenya — the East Africa Natural History Society

Nature Kenya is the East Africa Natural History Society (EANHS) in Kenya. It is a membership-based organization, founded in 1909. Nature Kenya invites all to join and be part of a strong and active society whose members are encouraged to participate in the study of nature and to support conservation activities.

Connecting nature and people to take action for biodiversity conservation is the Society's mission statement. Nature Kenya strives to:

- Build a strong network of people for conservation across the country
- Enhance knowledge of Kenya's biodiversity
- Advocate policies favourable to biodiversity conservation
- Promote the conservation of key species, sites and habitats
- Encourage community participation in conservation through the promotion of sustainable benefits.

Key to the abbreviations used

AM	Afrotropical migrant
E	endemic species or race
Ex.	species which are thought to have become extinct in Kenya
Hist.	no record for 50 years, i.e. no record since 1968 or earlier
IO	visitor from northwest Indian Ocean islands
MM	migrant from the Malagasy region
N	nomadic/wanderer
NR	not recently recorded, i.e. since the period 1969 to 1999
OM	migrant from the Oriental region
PM	migrant from the Palaearctic region
Rar.	Fewer than 5 records on East African Rarities Committee list at time of publication
RS	visitor from the Red Sea
SO	visitor from the Southern Ocean or Antarctica
VIO	vagrant from the northwest Indian Ocean
VM	vagrant from the Malagasy region
VN	vagrant from the Nearctic region
VO	vagrant from the Oriental region
VP	vagrant from the Palaearctic region
VSO	vagrant from the Southern Ocean or Antarctica
VSA	vagrant from southern Africa

[For consistency, the category of Vagrant has been applied to any species with more than 4 but fewer than 10 records at time of publication. This is separate from the Rarity category which covers those species with fewer than 5 records]

When these letters are in lower case, migrants of that category may occur alongside resident, non-migratory individuals or individuals of one of the other migrant categories. When they are in round brackets, some birds in Kenya might be migrants or wanderers from that particular region or area. 'Migrant', in the accepted ornithological sense, means a bird that moves on a regular, seasonal basis from one to one or more defined areas; thus, the majority of wader species that breed in the High Arctic leave their breeding areas to spend most of the year on coasts and wetlands throughout the temperate and tropical areas of the world; they are therefore true migrants. On the other hand, Little Grebes that travel, often at night, in search of newly formed ponds, are nomadic/wanderers, not migrants.

The 2009 checklist included the BirdLife/IUCN criteria for assigning threat status and category where appropriate. However, these criteria are applied at a regional level and not at a country level, and the status at country level can be quite different to the regional one. For example, Maccoa Duck is listed by IUCN as 'Near Threatened', but in Kenya it is considered to be 'Endangered'. Therefore, to avoid any risk of confusion, the criteria have been left off this list. That decision can be revisited in future if and when Kenya has those criteria determined at the national level. . However Appendix 2 lists those resident species that are considered to be at real risk of becoming extirpated

Some considerations in regard to this list

Revising a checklist is not a straightforward task and requires some decisions that will not be universally accepted. It is therefore important to outline some of the approaches that have been adopted for this fifth edition of the Checklist of the Birds of Kenya.

1. Taxonomy

Turner (2018) has highlighted the dilemma facing those responsible for preparing or updating checklists. As he points out, there are four ‘World Checklists’ (del Hoyo & Collar, 2014 and 2016; Dickinson & Remsen / Dickinson & Christidis, 2013 and 2014; Gill & Donsker, 2019; and Clements *et al.*, 2018) that are the most widely referred to but there is quite a variance between them in regard to taxonomic treatment. However, this variance is particularly reflected at the species level, with quite good common ground between the four world lists in regard to the family and generic levels. For example, the family Sylviidae as shown in the 2009 list is now divided into six families in this list. Similarly, the family Phasianidae comprised two genera in the 2009 list but now comprises six genera in this list. Both examples are supported by all four world lists. This approach was also greatly helped by referring to Mills (2017). However, the order of families has greatly changed since the 2009 list. This edition therefore follows the order proposed by Jarvis *et al.* (2014), Prum *et al.* (2015) and Suh (2016) and mirrors the order being used in the revision of Britton (1980) by Turner & Turner (in prep.). This order is set out in an index provided in Appendix 1.

At the specific level, this revision has not favoured selecting one of the world lists to follow, but has instead adopted a different approach. This approach acknowledges that a bird may be treated as a species rather than a subspecies in some checklists but it can still be recorded as an observation without forcing it to be assigned as a species or subspecies. For example, the taxonomy of Fiery-necked Nightjar and Black-shouldered Nightjar is controversial, so the approach used is as follows:

Fiery-necked Nightjar *Caprimulgus pectoralis*

☐

Fiery-necked Nightjar *C. pectoralis*

☐

Black-shouldered Nightjar *C. (p.) nigriscapularis*

It seems important to have this approach as this allows data to be kept that may be significant if and when the taxonomic issue is resolved. One further point of clarification is that the reference to a subspecies is specific to the above taxonomic context. The checklist does not list all subspecies occurring in Kenya, although endemic subspecies are highlighted.

2. Omitted species

The 2009 edition contained a list of omitted species. These omissions are repeated in this revision except where new evidence has come to light. The first type of evidence is where a species has been vetted and accepted by the East African Rarities Committee (EARC) since 2009. The second type of evidence is where a refereed published paper documents the validity of including that species - a reference is given for species that have been added in this manner.

There is, however, one new omission: Matsudaira's Storm-petrel. This is because there is now sufficient doubt in regard to the two claimed sight records from 1981. The records never underwent scrutiny by a Rarities Committee or any other formal vetting process. Sight records of this species are difficult to separate from other species in this genus, including the all-dark form of Leach's Storm-petrel which, in contrast, is on the Kenya list from a specimen. The safe decision, therefore, is to now exclude it.

3. Rarities

Kenya falls under the *aegis* of the East African Rarities Committee (EARC). The EARC mandate is to consider any species with fewer than five records for the countries of Kenya, Uganda, Tanzania, Rwanda and Burundi. The abbreviation 'Rar.' has therefore been introduced in this revision to indicate a species that is included on Kenya's list of fewer than five records at the time of publication. Where this status is indicated, then any record should be submitted to the Secretary of the EARC using the following email address: ea.rarities@gmail.com

4. Historical

Some species have not been recorded in Kenya for a significant period of time. The conventional time period for historical records is 50 years. The abbreviation 'Hist.' has been introduced to indicate relevant 'historical' species. However, quite a few species have not been recorded in the past 20 years, i.e. not seen in the current century. For that category, the abbreviation 'NRR' (Not Recently Recorded) has been introduced. Should a record occur that makes either of these categories invalid, then it should be submitted to the following email address: ea.rarities@gmail.com

5. References

The references quoted at the end of the checklist are particularly significant to the treatment used in this revision or are thought to be pertinent, but not necessarily unique, to the taxonomy being used.

Acknowledgements

The Bird Committee is indebted to Nigel Hunter for accepting the responsibility for spearheading this revision and the approaches used – no easy task, given the current taxonomic dilemma. He in turn was greatly assisted with information, suggestions and comments by Don Turner and Brian Finch, for which the Committee and Nigel wish to express their gratitude. Sincere thanks also need to go to Nigel Redman, Sidney Shema, Terry Stevenson and Washington Wachira for their very helpful comments and suggestions and to Nigel Redman in particular for his significant assistance with proof reading. We are also grateful to Colin Jackson for giving his permission to use his photograph of Kilifi (Clarke's) Weaver *Ploceus golandi*; to Brian Finch for use of his two Barbet photos; and to Fleur Ng'weno for undertaking the day to day liaison with Nigel Hunter.

The genera used follows Crowe *et al.* (2006) & Crowe *et al.* (1992).

☐☐☐☐☐ Common Quail *Coturnix coturnix* pm (nominate race *coturnix* NRR)

☐☐☐☐☐ Harlequin Quail *Coturnix delegorguei* am

☐☐☐☐☐ African Blue Quail *Synoicus adansonii* AM

☐☐☐☐☐ Scaly Francolin *Pternistis squamatus*

☐☐☐☐☐ Hildebrandt's Francolin *Pternistis hildebrandti*

☐☐☐☐☐ Red-necked Spurfowl *Pternistis afer*

☐☐☐☐☐ Yellow-necked Spurfowl *Pternistis leucoscepus*

☐☐☐☐☐ Jackson's Francolin *Pternistis jacksoni* E

☐☐☐☐☐ Chestnut-naped Francolin *Pternistis castaneicollis* NRR Rar.

Race recorded in Kenya is *atrifrons*. Should *atrifrons* be fully accepted as a separate species, English name will become Black-fronted Francolin

☐☐☐☐☐ Crested Francolin *Dendroperdix sephaena*

☐☐☐☐☐ Coqui Francolin *Peliperdix coqui*

☐☐☐☐☐ Ring-necked Francolin *Scleroptila streptophora* NRR

☐☐☐☐☐ Red-winged Francolin *Scleroptila levaillantii*

☐☐☐☐☐ Shelley's Francolin *Scleroptila shelleyi* (race *macarthuri* E)

☐☐☐☐☐ Elgon Francolin *Scleroptila elgonensis* (race *theresae* E)

The treatment of Elgon Francolin as a separate species from Moorland Francolin (as listed in the 2009 checklist) has been documented in Hunter *et al.* (2019)

☐☐☐☐☐ Archer's Francolin *Scleroptila gutturalis*

The wrong protocol was followed in the 2009 Checklist, using Orange River Francolin *Francolinus levaillantoides*, given that *gutturalis* was described prior to *levaillantoides* (Turner & Pearson, 2015)

Podicipedidae: grebes

Appendix 1: Index of Families

Page 5

Struthionidae: ostriches

Anatidae: ducks and geese

Numididae: guineafowl

Odontophoridae: Stone Partridge

Page 6

Phasianidae: francolins, spurfowl and quails

Podicipedidae: grebes

Phoenicopteridae: flamingos

Columbidae: pigeons and doves

Page 7

Pteroclididae: sandgrouse

Otididae: bustards

Cuculidae: cuckoos and coucals

Page 8

Musophagidae: turacos and go-away-birds

Caprimulgidae: nightjars

Apodidae: swifts

Page 9

Rallidae: rails, crakes and gallinules

Sarothruridae: flufftails

Heliornithidae: finfoots

Gruidae: cranes

Page 10

Burhinidae: thick-knees

Pluvianidae: Egyptian Plover

Haematopodidae: oystercatchers

Recurvirostridae: stilts and avocets

Charadriidae: plovers and lapwings

Page 11

Rostratulidae: painted-snipes

Jacanidae: jacanas

Scolopacidae: sandpipers and allies

Page 12

Turnicidae: buttonquails and Quail-plover

Dromadidae: Crab-plover

Glareolidae: coursers and pratincoles

Stercorariidae: skuas

Laridae: gulls, terns and skimmers

Page 13

Phaethontidae: tropicbirds

Oceanitidae: southern storm-petrels

Diomedidae: albatrosses

Hydrobatidae: northern storm-petrels

Procellariidae: petrels and shearwaters

Ciconiidae: storks

Page 14

Pelecanidae: pelicans

Scopidae: Hamerkop

Balaenicipitidae: Shoebill

Ardeidae: herons, egrets and bitterns

Page 15

Threskiornithidae: ibises and spoon-bills

Fregatidae: frigatebirds

Sulidae: boobies

Phalacrocoracidae: cormorants

Anhingidae: darters

Sagittariidae: Secretarybird

Pandionidae: ospreys

Accipitridae: hawks, vultures, buzzards, eagles and allies

Page 17

Tytonidae: barn owls

Strigidae: typical owls

Coliidae: mousebirds

Trogonidae: trogons

Page 18

Bucerotidae: hornbills

Upupidae: Hoopoe

Phoeniculidae: wood-hoopoes

Indicatoridae: honeyguides

Page 19

Picidae: wrynecks and woodpeckers

Rhamphastidae (Lybiinae): barbets and tinkerbirds

Page 20

Meropidae: bee-eaters

Coraciidae: rollers	Page 30
Alcedinidae: kingfishers	Emberizidae: old world buntings
Page 21	Hyliotidae: hyliotas
Falconidae: falcons	Stenostiridae: crested-flycatchers
Psittacidae: African parrots	Paridae: tits
Psittaculidae: lovebirds	Remizidae: penduline tits

Pittidae: pittas	Alaudidae: larks
Calyptomenidae: African broadbills	Page 31
Campephagidae: cuckooshrikes	Macrosphenidae: crombecs and allies
Oriolidae: orioles	Cisticolidae: cisticolas and allies
Platysteiridae: batises, wattle-eyes and allies	Page 33
Vangidae (Prionopinae): helmetshrikes and shrike-flycatchers	Locustellidae: grassbirds
Page 23	Acrocephalidae: reed warblers and allies
Malaconotidae: bush-shrikes, tchagras and puffbacks	Hirundinidae: swallows and martins
Dicruridae: drongos	Page 34
Page 24	Pycnonotidae: bulbuls
Laniidae: shrikes	Page 35
Corvidae: crows and allies	Phylloscopidae: old world leaf warblers
Monarchidae: monarchs (paradise-flycatchers)	Scotocercidae: erythrocerid flycatchers and hylia
Modulatricidae: Spot-throat and allies	Sylviidae: sylviid warblers and hill babblers
Nectariniidae: sunbirds	Zosteropidae: white-eyes
Page 25	Page 36
Ploceidae: weavers, bishops and widowbirds	Pellorneidae: illadopses (ground-babblers)
Page 27	Leiothrichidae: laughingthrushes and allies
Estrildidae: waxbills	Sittidae (Salpornithinae): treecreepers
Page 28	Buphagidae: oxpeckers
Viduidae: whydahs, indigobirds and Parasitic Weaver	Sturnidae: starlings
Passeridae: old world sparrows and petronias	Page 37
Motacillidae: wagtails, longclaws and pipits	Muscicapidae: scrub robins, African robins, chats and flycatchers
Page 29	Page 38
Fringillidae: canaries, seedeaters and allies	Turdidae: true thrushes

Appendix 2: Resident species that are considered Endangered in Kenya, with some at risk of possible extinction locally. The species listed below are included largely because of ongoing loss of habitat or no recent breeding records.

Maccoa Duck	Western Violet-backed Sunbird
Ring-necked Francolin (?Ex)	Uluguru Violet-backed Sunbird
Great Crested Grebe	Orange-tufted Sunbird
Black-billed Turaco	Superb Sunbird
Black-shouldered Nightjar	Hartlaub's Marsh Widowbird
Black-rumped Buttonquail	Heuglin's Masked Weaver
Rock Pratincole	Black-bellied Firefinch
Lammergeier	Black-bellied Seed-cracker
White-headed Vulture	Locust Finch
African Marsh Harrier	Magpie Mannikin
African Long-eared Owl	Broad-tailed Paradise Whydah
Shining Blue Kingfisher	Striped Pipit.
Semi-collared Kingfisher (?Ex)	West African Seedeater
Blue-breasted Kingfisher (?Ex)	Pale-eyed Black Tit (?Ex)
Taita Falcon	Green Crombec
African Grey Parrot	Taita Apalis
White-breasted Cuckooshrike (?Ex)	Little Grey Greenbul
Red-shouldered Cuckooshrike	African Spotted Creeper
Black-and-White Shrike-flycatcher	Purple Starling
Manda Black Boubou	Taita Thrush

Should a record occur in regard to any species on this list, then it should be submitted to the following email address: ea.rarities@gmail.com
